SUMMARY

MCA graduate (2026, GPA: 9.8/10) passionate about Data Science, Machine Learning, and Generative AI. Experienced in building AI-powered applications with Python, Streamlit, and Groq API, and applying data analytics to solve business problems. Proficient in Python, SQL, Power BI, predictive modeling, and data visualization, with a strong desire to leverage data and AI to create impactful solutions. Seeking opportunities as a Data Scientist, ML Engineer, or AI Engineer.

EDUCATION

Master of Computer Applications (MCA)

2024 - 2026

SRM Institute of Science & Technology, Chennai | Virtual Mode

Graduation: 2027 | **CGPA: 9.7 (Upto 3rd Semester)**

INTERNSHIP EXPERIENCE

Data Science Intern | SocialTek AI & ML Business Solutions, Hyderabad.

Feb 2026 – May 2026

- Accomplished operational insight delivery for large-scale event management, measured by identifying actionable patterns across 20,000+ data points, by executing end-to-end Python pipelines covering data collection, cleaning, validation, and statistical analysis.
- Generated structured service-level reports and Power BI visualizations adopted by operations teams to support safety planning, incident response, and contingency decision-making.
- Maintained 100% data accuracy across all project deliverables and ensured on-time delivery of analytics outputs by implementing structured data validation workflows.
- Collaborated cross-functionally with team members to align analytics outputs with operational requirements and organizational timelines.

Data analyst Intern | Codeveda technologies

Sep 2025 – Oct 2025

- Conducted data cleaning, exploratory data analysis, and reporting.
- Created dashboards and visualizations using Power BI.
- Prepared operational reports and documented findings.
- Assisted in maintaining organized datasets and business records.

PROJECTS

Public Transportation Delay Analytics Platform | Python, Power BI, Streamlit, Groq AI API

- Developed an analytics platform for Public Transportation Delay using Streamlit.
- Built interactive dashboards to analyse causes of delay, weather impact, congestion, and Route Insights.
- Created automated reporting and visualization solutions using Power BI and Streamlit.
- Generated AI-driven insights and recommendations using Cohere integration.
- Improved decision-making through real-time safety and operational analytics.
- Live app Link:- <https://public-transport-delay-analysis-flnjyvm3k5rvhsqzunqih.streamlit.app/>

AI Based Resume Screening System | Python, Streamlit, Google AI API

- Accomplished automated candidate-JD matching at scale, measured by sub-3-second real-time LLM inference, by engineering multi-step prompt pipelines using Claude Sonnet that extract match scores, missing keywords, and recruiter red flags.
- Designed end-to-end GenAI ownership — from system prompt architecture and context injection to Streamlit deployment — demonstrating full-stack Conversational AI development.

SKILLS

Data & Analytics: Power BI, MS Excel, Data Cleaning, EDA, Dashboard Development, Data Visualization

AI & GenAI: Claude AI, Groq API, Machine Learning, Prompt Engineering, LLM Applications

IT & Operations: IT Support, ITSM, Service-Level Reporting, Process Documentation

Tools: GitHub, VS Code, Microsoft Office, Streamlit

Languages: Python, SQL
